# Bruno Oliveira

Senior Software Engineer · Backend & Platform

Bauru, São Paulo, Brazil

brunooliveira812@gmail.com github.com/bruno303 linkedin.com/in/bruno-oliveira-516a05113 portfolio.bsoapp.net

## SUMMARY

Senior software engineer with 12+ years in software, focused on backend and platform engineering. Go, Kotlin and Java for services; Kubernetes, ArgoCD, Terraform and CI/CD for delivery; OpenTelemetry, Prometheus and Grafana for observability. Currently leading the technical side of an applied-AI platform that turns 300k+ support tickets per month into executive insight, with LLM pipelines designed so personally identifiable information never reaches the models.

## EXPERIENCE

### Senior Software Engineer — Wellhub

2024 — present · Remote

- Lead the technical side of an applied-AI platform that turns 300k+ support tickets per month into executive insight for leadership.
- Own a GCP batch-inference pipeline that classifies tickets with Gemini, generates reports with Claude and streams analyzed data to the datalake through Kafka.
- Designed the anonymization layer (Microsoft Presidio + spaCy) so personally identifiable information never reaches the models or the analytics layer.
- Part of the squad responsible for the service platform other product teams build on.

### Software Engineer — Creditas

2022 — 2024 · Bauru, SP, Brazil

- Built high-availability microservices for banking products with Java 17, Kotlin and Spring Boot/WebFlux.
- Operated workloads on AWS and Kubernetes with Terraform-managed infrastructure and CI/CD through CircleCI and GitHub Actions.
- Kept the reliability bar with New Relic and Datadog, reviewing the impact of every delivery.

### Software Developer Analyst — Matera

2020 — 2022 · Bauru, SP, Brazil

- Developed high-availability banking systems in Java 11+ with Spring Boot and MySQL.
- Integrated messaging through SQS and RabbitMQ; containerized services with Docker and operated on AWS.

### Software Developer Analyst — Finch Soluções

2018 — 2020 · Bauru, SP, Brazil

- Built RPA automations for the legal market with Java 8+, Selenium and HtmlUnit.
- Persistence with JPA over MongoDB and SQL Server.

### Developer & IT support — Grupo Multicobra

2014 — 2018 · Bauru, SP, Brazil

– Three-year progression from IT support technician to developer, building internal systems.

## EDUCATION

Faculdade de Tecnologia de Bauru (FATEC)
Database Technology degree · 2017 – 2019

UNESP — Universidade Estadual Paulista
Computer Science (incomplete) · 2014 – 2017

## LANGUAGES

Portuguese — Native

English — Professional

## SKILLS

### Languages

Go · Kotlin · Java · TypeScript · Node.js

### Platform & delivery

Kubernetes · ArgoCD · Helm · Terraform · AWS · GCP · GitHub Actions

### Data & messaging

PostgreSQL · MongoDB · DynamoDB · Redis · Kafka · RabbitMQ · SQL Server

### Observability

OpenTelemetry · Prometheus · Grafana · Loki · Tempo · Datadog · New Relic

### Practices

CI/CD · Testing · DDD · Clean architecture · Code review
